Karachi, Pakistan

PROFESSIONAL SUMMARY

Software Engineer with 7+ years of experience designing, developing, and maintaining frontEnd web applications and Android mobile applications using React.js, Vue.js, Next.js, Kotlin, and Java. Proficient in building scalable, high-performance applications with MVVM architecture, REST APIs, Firebase, and Material Design. Experienced in collaborating with cross-functional teams in Agile/Scrum environments to deliver reliable, production-ready software within tight deadlines. Familiar with AI-assisted development tools such as Claude Code and Cursor AI to enhance development productivity and code quality.

CORE SKILLS

Android Development: Kotlin | Java | MVVM Architecture | LiveData | ViewModel | Room | Retrofit | Coroutines | Firebase | API Integration | Material Design | Dependency Injection | XML Layouts | Gradle

Frontend: React.js | Next Js | Redux | Redux Toolkit | JavaScript ES6 | jQuery | Material UI | Bootstrap 4 & 5 | Tailwind css | Chakra UI | Scss | Css.

AI & Tools: Claude Code | Cursor AI | Chat-Gpt | Prompt Engineering | AI Workflows

Languages: Kotlin | Java | JavaScript | Next.js | React.js.

PROFESSIONAL EXPERIENCE

Android Developer | **AI-Raqtan (smc) Pvt Ltd** (Karachi, Pakistan)

Aug 2025 – Present

Raqtan HRM APP — Human Resource Management App.

- Developed Raqtan HRM, an Android attendance application using Kotlin, MVVM, Coroutines, and Flow with a modern single-activity architecture and Material 3 UI.
- Implemented punch-in and punch-out features with live geofencing, office QR verification, and selfie-based face detection to support on-site and remote attendance workflows.
- Integrated CameraX, ML Kit, and GPS services for QR scanning, face detection, and accurate location tracking with custom geofencing logic.
- Built secure authentication flows using Retrofit, OkHttp, biometric login, encrypted local storage, and automatic token refresh handling.
- Configured multi-flavor builds for staging and production, optimized timezone handling, responsive UI scaling, and smooth loading states for to reduce UI inconsistencies and enhance application stability.

QavaShop APP — E-Commerce Android App

- Implemented in-app updates using Google Play Core to ensure users always stay on the latest production version, including recovery handling for interrupted updates.
- Developed biometric login with Face ID/Fingerprint authentication integrated with Google Sign-In for a faster and more secure login experience.
- Designed and delivered a BNPL (Buy Now, Pay Later) split-payment feature with dynamic UI updates and bilingual support (English/Arabic).
- Built the Product Review module end-to-end, including review screens, reusable adapters, rating components, and backend API integration.
- Integrated Firebase Crashlytics and resolved critical production crashes by improving fragment lifecycle and null-state handling during app startup.

SphereY APP —Field Service Technician App

- Ensured SphereY Pro met Google Play's upcoming Android 16 KB memory page size requirements by upgrading Gradle, Android Gradle Plugin, and native library configurations to maintain production compliance.
- Built a complete video recording and upload feature for Service Completion and Technical Reports, allowing technicians to capture, preview, and upload videos directly from the app.
- Upgraded the Android build environment by modernizing Gradle, Kotlin, AGP, and multiple third-party libraries, improving project stability and compatibility with the latest Android Studio releases.
- Implemented Google Play Core in-app updates with a mandatory update flow to ensure users always run the latest production version.
- Improved the image capture and upload workflow by resolving duplicate image issues, crop-tool failures, resulting in a more stable and reliable user experience.

Frontend Developer | **AI-Raqtan (smc) Pvt Ltd** (Karachi, Pakistan)

Oct 2020 – July 2025

Ekuep — Ecommerce Platform

- Worked as a Senior Frontend Developer on the Ekuep platform, contributing to the customer-facing website and **Admin panel** since 2021.
- Worked extensively with JavaScript, jQuery, SCSS, HTML5, CSS3, and Laravel Blade templates to develop and maintain Ekuep's large-scale e-commerce platform
- Integrated frontend features with backend APIs and Laravel-based services for authentication flows, loyalty modules, cart functionality, quotation systems, and checkout experiences
- Led the frontend development for major seasonal campaigns such as White Friday, Ramadan, Eid, Saudi National Day, UAE National Day, and Founding Day, creating responsive bilingual experiences for both desktop and mobile users.
- Contributed to the **Ekuep Marketplace platform** by developing and maintaining scalable bilingual e-commerce features, product archiving functionality, and seamless customer shopping experiences across web platforms
- Worked closely with designers, QA, and backend teams in an Agile workflow using Bitbucket pull requests and long-running release branches.

Auto Quote — AI Powered RFQ-To-Quotation Automation Platform

- Worked on a React-based web application, building and improving frontend features, responsive UI components, forms, modals, and data tables.
- Developed and maintained user authentication flows, including Forgot Password and Reset Password functionality with API integration and form validation
- Managed application state using React state management patterns (hooks and component-level state) along with API-driven data flow for complex UI features.
- Improved overall user experience by fixing UI issues, enhancing responsiveness, and refining workflows across multiple application modules.
- Built reusable frontend components and integrated APIs to support product search, user management, and timeline/stepper-based workflows.
- Collaborated with development and QA teams in an Agile environment, following feature-branch and release-based Git workflows for ongoing deployments and updates

Frontend Developer | **Salsoft Technologies** (Karachi, Pakistan)

July 2019 – Sept 2020

EDUCATION

MS Computer Science (MScS) — National University of Computer and Emerging Sciences (Fast)
2024 – Karachi

BS Software Engineering (BSSE) — University of Karachi
2018 – Karachi

Intermediate Pre – Engineering — DJ Sindh Govt Science College
2014 – Karachi

Matriculation — Federal Secondary School
2012 – Karachi

CERTIFICATIONS

DOT NET FRAMEWORK 4.5 – Windows Application Development
Sir Syed University of Engineering and Technology
2015 – Karachi
